Angled Prosthesis

New TPA system
New TPA

Pentalobular Head Connection:
✓ Offers a more stable grip, providing greater reliability at the same time of exerting force with the screwdriver
✓ Increased resistance, up to 9.7%

New TPA Screwdriver

Pentalobular Elliptical Screwdriver:
✓ This ensures a greater grip guaranteeing a good transmission of the recommended torque in all possible angles
✓ Improved wear resistance

DLC Coating:
✓ More Hardness: 2500 vickers
✓ Lower friction coefficient (0.15), avoiding possible jams when applying the torque
✓ Matte black color reduces glare or reflections caused by light bulbs
